MEMBER ADVISERS HAVE SAID...

“The MASSP Student Leadership Program is important because students see themselves empowered in what could occur at school. It provides students with leadership training, infusions of energy, and opportunities to grow in a positive and safe environment. The excitement and motivation gained continues back at school.”

“For us, the MASSP Student Leadership Program has made us rely on prioritizing our lives and activities, develop new ideas for events; provide networking with other councils and advisers; motivates us to always do more by improving old activities and developing new ones; build strong relationships between ourselves, the advisers, and the students; taught us icebreakers and mixers to help breakdown “walls” between our members as well as members of other schools; kept us aware of what is going on in students lives; and, helps us train “leaders” not just “doers.”

“I became an adviser two years ago ... my principal enlightened me about MASSP Student Leadership-MASC/MAHS. Our council had no concrete direction prior to this and I was very new to this. MASC has helped me as an adviser with direction and unification. The conferences have provided me with new ideas and constant support. Our Council has chosen the motto, “Make A Difference” and according to our staff and some students- they are!”
